PROVIDING HYDRAULIC SOLUTIONS WITH A DYNAMIC APPROACH

Established in Leeds, West Yorkshire, at Oddy Hydraulics we have been at the forefront of hydraulic engineering and services to clients UK wide, for over 60 years.

Under the leadership of Simon Mace the company has grown to what it is today.

The company is a market-leader for hydraulic repairs and service and is recognised as a distributor for all the major hydraulic equipment manufacturers.

Combine this with the pro-activeness, forward thinking and can-do attitude of our team, we can confidently provide our clients with the most effective hydraulic solutions for their business, in an ever-changing market and industry.

A COMPLETE HYDRAULIC SERVICE

From our state-of-the-art facilities in Leeds, we can provide a complete hydraulics service. Whatever industry you operate in and whatever your requirements, we can:

- Service, test and repair all your hydraulic equipment, on and off-site
- Fulfil all your service part requirements
- Provide hydraulic system design
- Offer on-site services and training

At Oddy Hydraulics you can be confident our team will find the most effective solution for you and your business... providing fast turnaround, reduced downtime and value of money.

SERVICING AND REPAIRING

Our team of engineers can service and repair a wide range of hydraulic equipment. We can strip, clean, assess and identify what the best solution is - often leading to the successful repair of equipment, rather than the need to purchase new.

All equipment is serviced and repaired using only genuine original parts from the manufacturer and at Oddy's testing is of paramount importance. We ensure all equipment is tested to full capacity on our test rigs and that our clients are issued with test data and certifications, where required.

Our servicing and repair service includes:

- Hydraulic Pump Repairs
- Hydraulic Valve Repairs – from a simple directional valve through to a complex manifold assembly
- Accumulator Repairs and Written Schemes
- Hydraulic Power Unit Refurb and Repairs
- Cylinder Repairs – from a simple re-seal to a complete over-haul
- Servo and Proportional Valve Repairs

PARTS SUPPLY

With a long established offering to the hydraulics parts supply market, our experienced and dedicated sales team are well-equipped to assist you with identifying your hydraulic part and its purpose. Confidently offering a direct replacement or suitable alternative solution.

We stock a comprehensive range of parts and are sales partners and distributors for some of the most recognised and reputable manufacturers. This allows us to send many parts on an overnight delivery or same day courier, if required.

We can provide:

- Hydraulic Valves
- Hydraulic Pumps
- Components
- Hydraulic Filtration
- Filtration Hire Equipment

HYDRAULIC SYSTEM DESIGN

At Oddy's we are specialists in hydraulic system design. Utilising state of the art technology, we can deliver cutting edge equipment that is both energy saving and efficient.

Whether it's a small mini hydraulic power pack or a large complex hydraulic system we can deliver an effective solution. Adopting new technology, we can take your initial concept quickly through the design, build and test stages onto installation and commissioning.
